OLUWAFEMI EBENEZER AYODELE

FRONTEND DEVELOPER

PROFESSIONAL PROFILE

I specialize in Frontend development, proficient in HTML, CSS, and JavaScript. I am equally passionate about sharing knowledge and empowering others in the field of ICT. Beyond coding, I have a natural inclination towards multiple instruments, which I have honed through dedicated study. When not teaching, I am crafting responsive websites, immersing myself in music and scoring songs across various musical parts. I am deeply passionate about music theory for its enduring relevance, contrasting with the transient nature of technology. In terms of learning style, I lean towards tactile experiences.

PROFESSIONAL EXPERIENCE

CHRISLAND SCHOOLS LIMITED | ICT EDUCATOR| DATABASE ADMINISTRATOR

2014 – Present

Key responsibilities:

- Generated moderation sheets on a termly basis to maintain records of students' classwork, assignments, projects, and exam scores using Google Sheets. Each sheet in the workbook was allocated to individual teachers based on the subjects they teach. I used macro or Apps Script to duplicate other sheets.
- Taught students and facilitated collaborative efforts among them to compose a script for controlling Tello drones utilizing the Drone Blocks application.
- Facilitated the integration of various educational tools such as Kahoot, Khan Academy, etc. within the platform to enhance the learning experience.
- I organized virtual entrance examinations for students, utilizing a proctoring tool to monitor their activities.
- Provided guidance on navigating the online portal for accessing results and managing billing processes.
- Assisted parents via the Edu Porch online portal, addressing inquiries regarding student results and billing concerns.Drafted official emails for students and educators, ensuring clear and effective communication.
- Managed communication channels to streamline information dissemination within the school community.
- Developed and conducted training sessions for both new and existing educators on the effective use of technology in the school environment, the admin department is not left out.
- Conducted informational sessions to enhance parental understanding of the online portal functionalities.

Competencies

- Web development, designing and developing websites with HTML, CSS, and Bootstrap, while enhancing interactivity with JavaScript.
- Advanced skills in data manipulation and analysis using Microsoft Excel and Python, with expertise in creating visualizations and dashboards using Tableau.
- Database management, including creating queries, forms, and reports in Microsoft Access, establishing and managing table relationships, and utilizing SQL for querying and manipulation.
- Document production using Microsoft Word and hold a unique skill set in writing scripts for drones, backed by knowledge in relevant programming languages and frameworks.
